

JWCC Curated Portal - Release Notes

Release January 2025

Please visit <https://jwcc.azure.microsoft.com> to see the list of all services available in the JWCC Catalog including their specific product information and authorization status.

Microsoft is currently working to adjust the Azure Portal UI to display a `Disabled` state for any products not in the Catalog. Please note if a product is not in the Catalog it will be `blocked` for provisioning through the Curated Portal JSON file even if it doesn't appear as 'Disabled' in the Azure Portal UI.

If you notice any issues that are related to the Curated Portal JSON Policy implementation please file a Support Request and include `Curated Portal` in the title so the team can quickly address your issue. Curated Portal issues could present themselves in two ways:

1. An error message stating that the action on an authorized service is `blocked by Policy...`
2. A greyed-out button in an authorized service that blocks deployment of that service

If possible please include a screenshot or the text of the error message or UI problem in your Support Request to enable quicker incident resolution.

We appreciate your patience as we continue to improve the Curated Portal experience!

Note: Azure Managed Grafana is only authorized at the IL2 level. For IL4/5 customers Azure Managed Grafana is not authorized and care should be taken to ensure this service is not utilized (ex: Unselect `Managed Grafana` in the AKS/Monitoring blade when provisioning AKS resources etc.).

Resource Type Additions

The following resource types were added to the Curated Portal file because of file cleanup and validation or cloud updates

API Management

- `microsoft.apimanagement/service/workspaces/kubernetesmanaged/agent/synconfiguration`

App Service

`microsoft.web/workerapps/operationresults`

Automation

- `microsoft.automation/automationaccounts/webhooks`

Azure Advisor

- `microsoft.advisor/triageresources`

Azure Database for MySQL

- `microsoft.dbformysql/flexibleservers/selfheal`

Azure Database for PostgreSQL

- `microsoft.dbforpostgresql/locations/getautomigrationfreeslots`
- `microsoft.dbforpostgresql/locations/getlatestautomigrationschedule`
- `microsoft.dbforpostgresql/locations/updateautomigrationschedule`

Azure Kubernetes Service

- microsoft.containerservice/fleets/autoupgradeprofiles/generateupdaterun
- microsoft.containerservice/managedclusters/agentpools/deletemachines
- microsoft.containerservice/managedclusters/agentpools/machines
- microsoft.containerservice/managedclusters/customresources
